

THE PIOCHE WEEKLY RECORD.

VOL. XLVII.

PIOCHE, NEVADA, THURSDAY, JUNE 24, 1897

NO. 37.

Though the echoes of the last national election have barely died away, vigorous efforts are made by the Republican party to retain what it has won, and its efforts to mould public opinion are sent out already distributed regularly from the headquarters of the National Committee at Washington to every country paper willing to print it. This matter is furnished at regular intervals and free of all expense. The Committee's immediate effort is to bolster up the party's positions on the tariff bill, to explain why it is that the wave of prosperity prophesied last fall as speedily to come has not yet materialized, and to weaken, wherever possible, the influence of the efforts of Bryan in his proposed western tour. From force of circumstances, the fight of 1900 is already on and it promises to be, even more so than that of last year, a struggle for supremacy between the people proper and the money power of the country.

The foreign event of the week is the jubilee in honor of Queen Victoria's reign of 60 years. All the pomp and splendor of the nobility, the judicial, ministerial and war branches of the Government are exhausted to honor the Queen. The festivities are to occupy a week, and in every English speaking section of the world some act of recognition of the event is made. In the United States every large city has arranged through the Episcopal churches, prayers for the occasion. The scientific and other developments will pass the Victoria era into history as one of the most important the world has ever known.

The two cents added to the State tax this year on account of the State University bonds, is causing trouble. Ormsby County has given notice to the State that she will not pay it, so has Storey, and other counties are expected to do likewise. The University is not liked by Ormsby and Storey particularly, and they are consistent in refusing to recognize the tax. It would be different however, if the institution was located in either of the counties named. We would hear no objections raised then.

Nevada promises to rank among the foremost of the gold producing States shortly. Lincoln County is contributing handsomely from the DeLamar mines, and the placer work along the Colorado River and prospecting in the southwest will bring in more. Elko County has its Gold Creek, Tuscarora and other discoveries south of Elko, and Washoe falls in with Olinghouse Canyon. All together they make a fine showing with new discoveries daily being reported.

Lightning furnished another argument for women's dress reform in the report of four young ladies in Ohio, who while walking home from Church were struck by lightning. Three who wore corsets with ordinary steels, were killed outright, while the fourth who was corsetless escaped with a slight shock. Of corsets it's a matter of speculation how far the body gear was to blame for the accident.

One reason why Carson wants a fistic tournament to come off there in the fall is to show the loveliness of the climate. The fall season is uniformly fine. The extreme roughness of the weather last March at the Corbett-Fitzsimmons fight sent away most of the newspaper men with bad opinions of the place and the Carson people naturally want this impression corrected even if it takes a prize fight to do it.

The number of deaths and prostrations from heat in the eastern states now beginning to come in make one doubly appreciate the glory and beauty of our mountain climate, and a pity it is that the conditions are not such that hundreds of thousands of the dissatisfied, unhappy and physically poor of other sections cannot enjoy with us its beauties and life giving influences.

The number of cattle driven out of this county within the past six weeks shows the importance of the cattle industry. Every dollar of the money thus realized circulates immediately in ordinary business avenues in this vicinity.

From the amount of second grade ore in sight in and around town, employment may be found shortly for from 30 to 50 men. With that number of men drawing wages Pioche would consider itself on earth again.

THE SOUTHERN INDIAN SCARE.

Whites Still Apprehensive of Danger—The Renegade "Mouse" Supposed to have left the Country.

Since the murder of the five white men by the Indian Avote, at Eldorado Canyon, last month, scouting parties of Indians have been out after Mouse, the brother of Avote, to deal with him for the murder of the two prospectors whom he lured to their death last January, under pretense of piloting them to rich ledge croppings.

Mouse has not been found however and is supposed to have left the country. When the scouting parties took up the search Mouse was supposed to be hiding in the mountains near the Vegas ranch.

A recent letter from that place says that Indians of the scouting party had stopped over for two days at the ranch. All were well armed and several of them were impudent and saucy. They claimed not to have seen anything of Mouse and to give up the search.

Several settlers thereabouts think the renegade Indian has gone south into the San Bernardino mountains. They want the search continued and a reward put upon his head, for a half hearted effort at capture and apparent listlessness of the whites, render them subject to further depredations at the hands of the Indians.

Pioche is experiencing a fresh beef famine.

Dr. J. D. Campbell has been appointed as a school trustee for Pioche District vice James Nesbitt resigned.

Eugene Goodrich came up on Monday night from DeLamar on Lodge business and returned yesterday morning.

It is estimated that about 4000 head of cattle have been sold and driven out of the county within the past forty days.

The Queen rode to London for the jubilee celebration in a car specially made for the occasion and of American design.

Cattlemen from the surrounding valleys have been in town during the week settling up from their receipts from cattle sales.

Pierce, the little son of F. P. Swindler while playing on Tuesday at DeLamar, fell and sustained a broken arm. Dr. Hammond set the limb and the little patient is getting along nicely.

At his ranch in Humboldt County about 30 miles from Kennedy, Jacob Leick killed Frank Hellen a week ago last Wednesday. It was done in self defense and it was generally supposed Leick would be discharged on preliminary hearing.

Heavy cattle shipments from Milford have caused a luteness of the train there several times of late. Once the stage came away without the mail, but concluded afterward to wait on like occasions and have the delay properly noted by the postmasters. Trains are obliged to wait for one another at the sidetracks provided on the Milford portion of the road.

The Tuscarora Times-Review, after a suspension of nearly two years has resumed publication. Silver mining formed the bulk of all work a few years ago there. Latterly gold developments have caused a resumption of work in many quarters and this, with work going on at Gold Creek, furnished justification for once more launching out.

A Grand Fizzle.

Private advices from one of the crew of the big brig Percy Edwards, which sailed from San Francisco some two months ago for the Solomon Islands, with a party of 100 men, who expected to find an Adamless Eden to colonize, has been received to the effect that the expedition collapsed at Fiji. After a general distribution of community property many of the colonists left the vessel and sought employment on the shore and the remainder resolved to take the brig to New Zealand, where she will be sold at auction. The proceeds are to be divided.

Estray Notice.

Strayed from Comet district two weeks ago, two bay horses branded J.D. supposed to have gone towards Elko. Both shod and the lighter bay wore a bell. Please send any information of their whereabouts to the undersigned, and be rewarded. HENRY T. FREUDENTHAL, May 11th, 1897. Pioche.

SERMON BY MCKINLEY.

A Few Thoughts for Republicans to Commit to Memory.

And seeing how the multitude had voted for me I stopped political speaking and went up in the White House.

And when I was seated and had tapped a fresh bottle of ale, I opened my mouth and taught my disciples, saying:

Blessed are the poor for they shall be poorer.

Blessed are the rich, for they shall be made richer, and shall taste of the good things of the world.

Blessed are those who expect nothing, for they shall not be disappointed.

Blessed is the champion liar, for he is my main dependence.

Blessed are the weak for they shall be kicked off the face of the earth.

Blessed are those who hunger, for they shall have plenty of company.

Blessed are ye when men shall revile you and persecute you for my sake, for you shall eat official pie at my hands.

Blessed is the man that shall bring me another bottle of ale, for this one is all gone.

Blessed is the man who contributed to the campaign fund, for he shall receive an hundred fold more than he gave.

Blessed are the politicians, for we are in the sun's boat.

Blessed is the thief for he shall have abundant opportunities to steal.

Blessed is the lobbyist, for he shall have the fat of the land.

Blessed is the bunter, for his is the kingdom of earth.

Ye are the salt of the earth, therefore salt down everything in sight.

Ye are the light of this earth, for you carry torchlights in every procession.

Let your torch-lights so shine before men that they can see the eagle on your hat; and glorify me, who art your political father.

Take heed that you provide soup houses for the poor, for a hungry man is liable to blow you up with dynamite.—Xenia, Ohio, Herald.

A Money Making Plan.

An exchange tells a story of a man in Chicago, who determined to spend all that he made the first year in advertising. He soon found that it was impossible, for the more he advertised the more money he made, and after a strenuous effort he gave it up. Of course, if you don't believe this the only way you can prove it is to try it.

FIFTY DOLLARS FOR FIFTY CENTS.

What Andrew F. Gregerson Says About Trib.

"While working on the Southern extension of the U. P. railway system near Clover Valley, in Lincoln county, Nevada, I observed a very large, hardswelling on the leg of one of my horses. It had apparently been caused by a kick from another animal. Five or six applications of Trib, in the course of two days completely cured the swelling and the horse is as good as new. The remainder of the 50-cent bottle was successfully used by a number of railroad workmen to cure sore arms, sprained muscles, etc., until it did fifty dollars worth of good. For this reason I gladly give the use of my name to further spread the knowledge of this good liniment. My permanent address is at Silver Reef, Utah. Andrew F. Gregerson.—Pioche Record 1890.

The Projected Railroad to Lake Tahoe.

The Surveyors commenced work on Tuesday, for the projected railroad between Truckee and Lake Tahoe.

The Truckee Republican says that the prime object of the survey is to ascertain what the cost of construction will be. If the cost does not exceed a certain figure, the road will be built this summer, otherwise the project will be abandoned; all depends upon the result of the survey. The report that ground has been broken on the road is a mistake and it will be three or four weeks before it is fully determined whether the road will be built or not.

WANTED—SEVERAL FAITHFUL MEN OR WOMEN to travel for responsible establishment in Nevada. Salary \$750 payable \$15 weekly and expenses. Position permanent, no other duties, no self-interest. Apply to National Star Building, Chicago.

PHENOMENA SEEN IN THE STARS.

Some Peculiarities Recently Discovered in the Heavenly Bodies.

A late circular issued from the Harvard college observatory includes in its account of the most important recent discoveries the spectrum of a star known as Zeta Puppis, its remarkable character being unlike that of any other yet obtained, the continuous spectrum containing three systems of lines—first, the dark hydrogen lines, which are found in stars of the first type; second, two bright bands or lines, which may be identical with the adjacent lines in spectra of the fifth type, and third, a series of very faint lines. But the most important feature of this spectrum, says the New York Sun, is a new element, not found on the earth or in any other stars, an element which, though similar to hydrogen, is yet distinctly different from it; and what it is or by what name to call it astronomers are undecided, the marked peculiarity being noted that it produces a vibration systematic rather than accidental, of three-tenths of a meter, and the action of which can be traced only on a specially prepared photographic plate. Another extraordinary discovery noted is a new variable star, in the constellation Crux, with a period of about a year.

WE MAKE WHEELS, Tool
Quality Guaranteed the Best.

STYLES: Ladies', Gentlemen's & Tandem.
The Lightest Running Wheels on Earth.

THE ELDRIDGE
...AND...
THE BELVIDERE.

We always Made Good Sewing Machines! Why Shouldn't we Make Good Wheels!
